

Microbiologist for R&D

AB BIODISK is a Swedish diagnostic company focused in the development and manufacturing of innovative products for antimicrobial susceptibility testing of microorganisms. Customers include hospital and reference diagnostic laboratories as well as the antibiotic industry. Etest®, the main product line comprises an innovative technique for MIC (Minimum Inhibitory Concentration) determinations. Etest is used in clinical laboratories throughout the world in at least 100 countries. Please visit www.abbiodisk.com for more information about us and our products.

We are currently looking for a curious and creative person to join our R&D team for the development of new and exciting products.

RESPONSIBILITIES

- Function as the microbiology specialist in the R&D team.
- Partake in product development projects.
- Participate in laboratory work related to product development.
- Analyse and compile reports, including publications.
- Presentation of product applications and scientific work at internal courses and international meetings.

EXPERIENCE/PERSONAL TRAITS

- Experience in product development is highly valued.
- Self-motivated, analytical, and a curious problem-solver personality.
- Able to handle more than one project and deliver results on time.
- Structured working ways and ability to prioritise the “right” things.
- Efficient yet with no compromise on quality.
- Well developed presentation skills in writing and orally.

EDUCATION

- Academic background in the biomedical field with a PhD in microbiology.
- Professional experience in the clinical microbiology field is of high merit.
- Excellent English (mother tongue level) is a prerequisite.

We offer an independent position with excellent opportunities for personal and professional growth. Please send your application and CV to work3@abbiodisk.se. Kindly note that we will not accept telephone enquiries regarding this position.
